

Ageless Movement - Beta Guide

Thank you for being one of our first testers

You are getting early access to the Ageless Movement app. Your job is simple: use it like you normally would, then tell us what works and what does not. Below is a short checklist of things that would help us most. No pressure to do it all at once, but the more you try, the more useful your feedback is.

Your beta checklist

1. Finish setting up

Complete onboarding and your movement assessment so the app is tailored to you.

2. Start a program

Open Explore and start a program (AMS Ground Zero is a good place to begin).

3. Do and log a workout

Run a session in the app and try the rest timer. Mark it complete when done.

4. Log an outside workout

Did something away from the app? Use Log Other Workout on the Home calendar.

5. Explore the library

Have a browse: a follow-along, a recipe, or an upcoming event.

6. Book a testimonial (optional)

Happy to share your story? Book a free Testimonial Recording from the feedback area.

7. Send us feedback

Open Feedback & Testimonials in Messages to report a bug, suggest an idea, or leave praise.

How to send feedback

In the app, go to Messages and open "Feedback & Testimonials". You can leave feedback or share a testimonial. You can also reply directly in your "Ageless Movement Team" chat any time.

Ageless Movement - private beta. Thank you for helping us build it.
